RayStation

5–6 November | Stockholm, Sweden

7TH EUROPEAN USER MEETING 2018

A WORLD WHERE CANCER IS CONQUERED. OUR COMMON VISION.

Let's kick-off this meeting by listening to the challenges we have ahead of us to reach that vision with former ESTRO President and Head of Radiation Oncology at Gent University Hospital, Prof. Dr. Yolande Lievens. Our CEO, Johan Löf, will then present how RaySearch is working to meet those challenges.

The meeting will then go on with user presentations, the plan challenge and plenty of time to meet with development and research. Check out the highlights. Don't wait any further, sign up now!

KEYNOTE SPEAKERS

What are the key challenges to conquer cancer?

Prof. Dr. Yolande Lievens,
Chair of Radiation Oncology Department,
University Hospital Ghent, Belgium

Fight cancer with code. How RaySearch is helping through software innovation.
